

Submissions by ChronosHub

ChronosHub automates your manuscript submission workflow with AI. Data extraction, validation, and compliance checks happen upfront. Authors get a faster experience and you get cleaner metadata.

Give authors confidence

Clear requirements and upfront charges help your authors submit right the first time.

Catch issues early

Error flagging and metadata validation means less clean-up for your teams later.

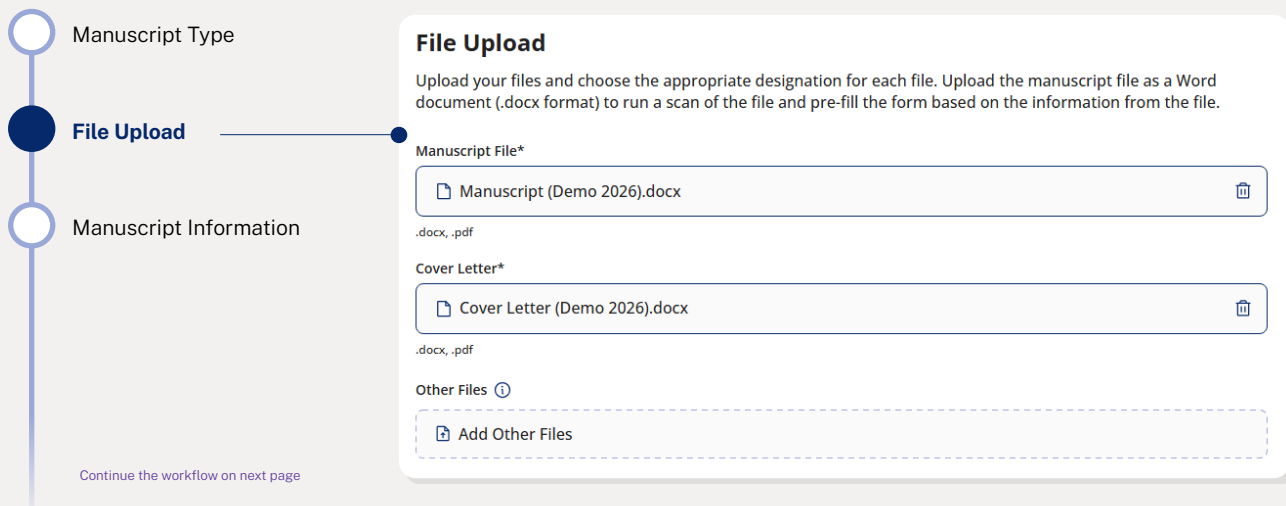

Configure each journal

Customize submission flows and fields to match every publication's requirements.

All your submission workflows supported

- ✓ **Original**
New manuscript submissions.
- ✓ **Transfer**
Manuscripts moving between journals.
- ✓ **Invited**
Solicited submissions.
- ✓ **Revision**
Revised manuscripts responding to peer review.
- ✓ **Resubmission**
Resubmissions following rejections or withdrawals.
- ✓ **Unsubmission**
Let authors make edits to their submission.

A simple step-by-step process

"ChronosHub has helped us get submissions down to six minutes in many cases. And we're getting better metadata feeds into our peer review than ever before."

— David Haber, Publishing Operations Director, American Society for Microbiology

Author Information

Author Information

Provide information for all co-authors and match the order in which they are listed on the manuscript.
